VERTOX OKTABLOK II DECLARATION

Allergens in bait

PelGar International Ltd submit the following declaration in respect of allergens in baits.

Vertox Oktablok II containing the active material brodifacoum is made using wheat, other cereals, and milk powder and contains the fungicidal and bactericidal agents OIT and BIT.

Wheat and gluten containing cereals and milk products are known allergens. OIT and BIT are capable of causing an allergic response if in contact with the skin.

Mitigation:

Baits should be used in bait boxes or protected bait stations when used in food packaging, processing or storage facilities. Such bait boxes will reduce the probability of bait contacting food.

Vertox Oktablok II does not contain any of the following items typically considered to be allergens:-

- | | |
|----------------------------|--------------------------------|
| 1. Peanuts | 2. Nuts |
| 3. Eggs | 4. Fish |
| 5. Shellfish & Crustaceans | 6. Sesame seeds |
| 7. Celery | 8. Sulphur dioxide & Sulphites |
| 9. Lupin | 10. Mustard |
| 11. Molluscs | 12. Soybeans |
| 13. Peas & Legumes | |

Vertox Oktablok II is manufactured by PelGar International Ltd at Units 11-13, Newman Lane, Alton. Hampshire. GU34 2QR. UK.

Sincerely,

Dr. Jonathan Wade, Technical Director
